The Endurance difference.

Your Door. Your Style.

Each Endurance door is meticulously crafted to reflect your individual style, allowing you to showcase your personal touch at the entrance of your home. With a diverse selection of over 93 stylish door designs, 25 colours, and an impressive array of glazing and hardware accessories in our range, there's an Endurance door for every type of home and every kind of homeowner.

Built To Last

Every component of an Endurance door has been carefully considered, with longevity and durability at the heart of everything we do. Each part of our specification has been rigorously tested, from our heat reflective doors skins to our 48mm solid timber core, to ensure that your Endurance door will stand the test of time.

We're Proud Of Where We've Come From

For almost 30 years, our dedicated team has been crafting robust engineered timber doors from our manufacturing facility in North Lincolnshire. Currently, we have a workforce of over 300 local people, each proud to contribute to the production of the UK's most enduring, stylish, and secure entrance doors.

Moisture barrier system.

Our unique Moisture Barrier System is concealed within the foot of every Endurance Door, completely protecting the solid timber core from moisture ingress and preventing common composite door issues like delaminating, swelling, or sticking within the frame.

48mm solid timber core.

The Endurance door's heavyweight construction sets it apart, weighing up to 40% more than other composite doors. When you close your Endurance door, the solid clunk assures you that your home is protected by the sturdiest and most secure entrance door on the market.

100% Solid

Unlike other composite doors that may incorporate timber sub-frames or foam, an Endurance door is comprised of 100% solid timber. Count on your Endurance door to maintain its shape, resisting bending and twisting that other composite doors may succumb to.

Keeps Your Home Warm

With its solid core, an Endurance door goes beyond standard features, prolonging the warmth in your home. Engineered with robust construction and premium materials, it effectively retains heat, bolstering energy efficiency and guaranteeing a snug living environment.

Peace And Quiet

Totally solid and up to 10% thicker than other entrance doors, an Endurance door can reduce noise from the outside making its way into your home.

Heat reflective skins.

Endurance doors feature cutting-edge CoolSkin® technology, meticulously designed to deliver a lifelike woodgrain texture while safeguarding against common issues associated with composite doors such as delamination, cracking, or bowing.

By reflecting up to 95% of the sun's rays, CoolSkin® technology effectively prevents your Endurance door from overheating. This innovative feature addresses the primary cause of post-installation problems with entrance doors.

Why choose an Endurance door?

- A Locking Cylinder**
Every Endurance door comes with the High Security, Sold Secure Diamond Grade locking cylinder.
- B High Security Multi-Point Locking System**
Our locking systems are tested to Secured By Design specified PAS 24 Security Standards.
- C Solid Timber Core**
48mm thick cross laminated solid timber core makes the Endurance door the most solid and secure on the market.
- D Moisture Barrier System**
Our unique Moisture Barrier System is concealed within the foot of the door - completely protecting the solid timber core of an Endurance door from moisture ingress.
- E Hardware Accessories**
Our hardware accessories have been rigorously tested to ensure their durability - so you can count on them to look great for years to come.
- F Robust Heat Reflective Door Skin**
CoolSkin® technology used to produce our door skins offers a realistic woodgrain texture whilst protecting against delamination, cracking, bowing or warping.
- G Perfectly Colour Matched Frames**
Our door frames are strong, secure and perfectly colour matched to the rest of your Endurance door.
- H Thermally Toughened Glazing**
Our decorative glazing is both thermally toughened and argon-filled, ensuring optimal security and thermal efficiency as standard.

**AV2 Heritage
Automatic Lock**

QuadHook+

Our locking options.

Our range of locking mechanisms offer an exceptional degree of security, meaning you can relax knowing your home is protected by some of the most tried and tested technology available.

Guardian5

The Guardian5 gets its name from its five secure locking points: four robust locking pins - two at the top and two at the bottom - plus a strong central deadbolt. To lock the door, simply close it, lift the handle to engage the pins, then turn the key to secure the deadbolt. To unlock, turn the key and press down the handle. Combining ease of use with exceptional strength, the Guardian5 offers outstanding protection and peace of mind.

QuadHook+

The QuadHook+ takes home security to the next level with its precision-engineered 5-point locking system. Four opposing tensile steel hooks and a sturdy central deadbolt are spaced evenly from top to bottom, securing the door along its entire height. To lock, simply close the door, lift the handle to engage all hooks, then turn the key to set the deadbolt. To unlock, turn the key and lower the handle. The QuadHook+ offers balanced, reinforced protection you can rely on.

AV2 Heritage Automatic Lock

The AV2 Heritage combines traditional styling with modern security. Its elevated locking cylinder recreates a classic look, while the automatic mechanism secures your door every time it's firmly closed. Two robust tensile steel hooks at the top and bottom engage instantly via an internal firing system, and a key turns the central deadbolt for added security. To open from the outside, use the key to retract the hooks and deadbolt. From inside, exit easily with a thumb turn or key. Ideal for doors with fixed handles or finger pulls, the AV2 Heritage ensures secure, key-only access once shut.

AV4 / AV4 Heritage Automatic Lock

The AV4 delivers automatic security with smart flexibility. A discreet magnetic trigger within the frame activates two robust tensile steel hooks - one at the top and one at the bottom - every time the door closes firmly. A daytime release function lets you temporarily disable the auto-locking when needed. The AV4 is available with the locking cylinder in either a standard or elevated Heritage position, and can be paired with an optional internal lever rose handle for easier operation from inside. Perfect for doors with fixed external handles or finger pulls, the AV4 ensures secure, key-only entry from the outside once closed.

Scan here to learn more about our locking options.

Guardian5

Locking cylinder positions.

Standard Position

The standard locking position of the Guardian5, Quadhook+ and AV4 locking mechanisms are mid-way down the door.

Heritage Position

The AV2 and AV4 automatic locking mechanisms are available in a Heritage variation. This locking position is ideal for bringing a traditional feel to your entrance and can be combined with any of our fixed handle options.

High security locking cylinder.

At Endurance, we believe everyone has the right to feel safe and secure in their own home. That's why every Endurance door comes complete with the innovative Ultimate high-security locking cylinder, one of the most secure locking cylinders in the UK.

The ingenious locking system of the Ultimate locking cylinder knows when it's being attacked. If an attempted breach is detected, an inner mechanism automatically engages to lock down the cylinder and prevent burglars from accessing its internal components.

Lock snapping has become the preferred entry method for UK criminals and the Ultimate locking cylinder has another trick up its sleeve to keep burglars at bay. A sacrificial cut is used so that when the burglar grabs the end of the cylinder, just the tip snaps off, leaving more metal in front of the central locking mechanism as protection.

Having been tested to Sold Secure 'Diamond Grade' standards, the Ultimate locking cylinder has achieved a level of security that far surpasses other locking cylinders on the market.

Every Endurance door is supplied with 5 High-Security Dimple Keys as standard. These keys can only be reproduced by quoting your unique key reference number, so nobody can copy your keys without your consent.

To learn more about our high security locking cylinder, scan the above QR code.

£2000 security guarantee.

We are so confident in the unprecedented level of security offered by the Ultimate High Security Locking Cylinder used in our doors, that in the unfortunate event your home is broken into by means of snapping the cylinder, we will offer £2000 in compensation.

Find out more about our Security Guarantee.

Terms & Conditions apply. See website for full details endurancedoors.co.uk/security-guarantee

You're in safe hands.

We select only the most dedicated and skilled installers to join our Installer Partner Network, ensuring that your Endurance door is installed to the highest standard possible. Our Installer Partners not only have access to the most stylish and secure doors in the UK but also benefit from our extensive knowledge and expertise. We prioritise continuous improvement, providing GQA certified training to our installers at our specialised training facility.

Each year, our Installer Partners oversee the installation of tens of thousands of Endurance doors, contributing significantly to our outstanding reputation as the only UK manufacturer rated as excellent on Trustpilot. This accolade is a testament to their expertise and commitment. When choosing one of our Installer Partners, you can trust that you'll receive expert advice in selecting the right door for your home and experience the highest quality installation.

To ensure that our Installer Partners reach our high standards, they must meet the following criteria:

- ✓ Have a track record of installing Endurance doors to our agreed fitting standard
- ✓ Have a clearly defined customer care policy that places the needs of the homeowner first
- ✓ Have clearly defined policies for monitoring service levels and handling complaints
- ✓ Have an excellent knowledge our products and take part in specialist training

Find your local installer.

Beautiful job!

Fitters turned up on time and worked continuously. They left no mess whatsoever. The new front door looks great. Highly recommend.

Claire

A very pleasant experience

Our installers were very patient and attentive in helping while choosing our door. Their attention to detail was second to none.

Linda

The only UK door manufacturer rated as excellent.

At Endurance, we believe informed choices matter - especially for something you use every day like your entrance door. With over 3,000 Trustpilot reviews and 87% rated five stars, our reputation speaks for itself.

Choosing an Endurance door through our Installer Partner Network means a five-star experience from start to finish. Quality

products and skilled installers are why we're the UK's top-rated door manufacturer.

Scan this QR code to visit our Trustpilot page and read our customer reviews.

"Really helpful with enquiries and a supportive and friendly team. We've had lots of comments on how fabulous our door is."

★★★★★ by Mikki

"High quality and very secure doors in a great range of designs & fittings, great value for money."

★★★★★ by Laura

"Great door , looks fantastic & massive improvement on the old one with respect to insulation & heat retention."

★★★★★ by Tim

Our recent projects.

At Endurance Doors, we believe every home deserves a beautiful, secure entrance. That's why we share real customer case studies to inspire your own journey. Discover how homeowners across the UK have transformed their homes with our Classic, Country, Urban, and Avantal door collections.

Each story highlights unique styles, personal choices, and the outstanding results our doors deliver. Whether you're looking for timeless elegance or modern impact, our case studies show what's possible. Explore real transformations and find ideas to create an entrance that's perfectly tailored to you, combining strength, style, and lasting performance.

Working with Endurance Doors has been really great from the start. They helped us through the whole process. When the fitters came they were very accommodating and made me feel really comfortable.

Louise's Project
Bristol, South West

I'd definitely recommend Endurance Doors to my family and friends. The whole process has been really efficient from start to finish and we're thrilled with how finished project looks.

Steve & Kay's Project
Shropshire, West Midlands

I'd absolutely recommend Endurance Doors. We've had lots of visitors who've asked me where our beautiful new door came from and I love talking to them about the whole experience.

Sarah's Project

Wigan, North West

I chose Endurance Doors mainly because of the quality, but also the vast range of colours, shapes, sizes, glass, everything you can get with it.

The installers were great, it was done within a day.

Andy's Project

Guildford, South East

I love the style, it looks beautiful, it definitely improved the whole look of the house, it just looks all new and fresh again! We've had loads of compliments from neighbours, family and friends.

Rebecca's Project

Mansfield, East Midlands

We came across Endurance Doors online and they were a brilliant fit, there was lots of choice and modern designs that we liked.

It was really great because we could choose different colours on the inside and the outside.

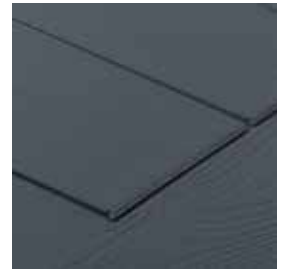

Lisa's Project

Crewe, North West

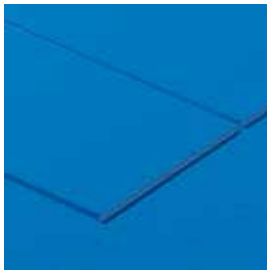

The Endurance colour collection.

Endurance doors are available in your choice of 25 colours, with the option to choose an alternative colour for the exterior and interior of your door. Most of our customers choose a

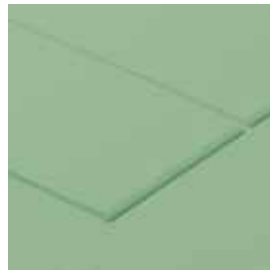

white internal finish, but with so many different colours available the decision is yours. We're also able to offer perfectly matching door frames for most of our door colours too.

Stable doors.

Open up the inside of your home with our range of stable door designs. Suitable as both a front and back door, our extensive range of styles and colours are the ideal way to add a personal touch to your home.

Endurance stable doors come with two completely separate locks, with a high strength centre gear box, a handle operated top lock and a key/thumbturn operated bottom lock. These locks come keyed alike, meaning both locks can be opened with a single key.

- ✓ The key operated bottom lock escutcheon is available in a variety of finishes
- ✓ The internal centre locking bolt is available in gold, chrome and black finishes

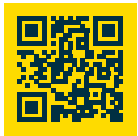

Stable doors offer advantages and uses in various settings. Some of these include:

Ventilation and Light

By opening the top half of the door while keeping the bottom half closed, fresh air and natural light can enter your home, providing ventilation and illumination.

Charm and Aesthetics

Stable doors have a distinctive and charming appearance, adding character to homes. They are often associated with rural or farmhouse-style architecture.

DDA Thumbturn.

Our new DDA-compliant thumbturn is a simple, thoughtful upgrade for homeowners with reduced hand dexterity. Larger and easier to grip, it needs 40% less force to operate the locking cylinder. Available in chrome, brass, or nickel, it's an optional addition that makes everyday use smoother without sacrificing style.

Lever Rose handle.

Our new Lever Rose handle ensures easy exit from auto-locking doors. Designed for internal use and paired with an external pull bar, it offers an accessible alternative to a traditional thumb turn – available in Stainless Steel, Premium Stainless Steel, and Premium Matte Black.

TOUCHKEY

Highly secure versatile keyless entry.

ERA TouchKey is a secure, keyless entry solution that combines advanced smart technology with trusted mechanical door hardware. Using multi-level authentication, it allows homeowners to unlock their door without a traditional key, offering convenience without compromising on security.

The system includes an auto-fire multi-point lock, smart handle, and anti-bump cylinder - all designed to resist forced entry. Its seamless integration of smart and mechanical components ensures a strong, reliable line of defence.

TouchKey can be used as a standalone solution or as part of the wider ERA smart ecosystem, which includes alarms, video doorbells, and security cameras - all controlled through a single mobile app. The ERA app allows users to manage access, view activity logs, and share Digital eKeys with family and friends.

With a removable communication module, the system is future-ready. Paired with an ERA Smart Hub, it enables remote unlocking from anywhere in the world - delivering intelligent, connected home security.

Unlock your home using:

Behind your door.

At Endurance, we understand that sustainability is a key concern for our customers - and it's equally important to us. With over 30 years in production, we continually evolve our sourcing and processing methods to make greener choices.

A Carbon Balanced Business

As a member of Carbon Neutral Britain, we assess our climate impact and offset unavoidable emissions through the protection of carbon-rich habitats - supported by our timber sourcing practices.

Environmentally Conscious

Our solid timber core is made using 100% traceable wood from sustainably managed Finnish forests. For every tree felled, four seedlings are planted. These forests are growing 40% faster than they are harvested, and the process from forest to mill is carbon negative.

A Low Carbon Door

Our production methods use minimal carbon, and each timber core stores up to 1 tonne of CO₂ per 1m³ - acting as a natural carbon sink.

Environmentally Friendly

We operate a 0% landfill manufacturing policy, reusing and recycling all waste. Our composite doors are delivered via fuel-efficient transport routes, with schedules closely monitored to reduce emissions.

Our accreditation:

Endurance doors are tested to:

BS EN 6375-1:2015 + A1:2016

Air permeability, resistance to wind load & watertightness

BS EN ISO 10140-2:2010

Classification for airborne sound insulation

BS 6375-2:2009

Classification for operation and strength characteristics

BS EN 10077-1:2017

Classification for thermal performance of doors

PAS 24 :2022+A1*

Enhanced security performance requirements for doorset

*Must be ordered as a Secured By Design compliant specification
